EDUCATION

IE New York College — **New York, NY**
Master of Science in Finance, Global Markets & Asset Management — **August 2026 – June 2027**
- **Activities and Societies:** President and Co-founder, IE NYC Finance & Strategy Club; Member, IE NYC AI & Analytics Club and IE NYC Quant Club.

IE University — **Madrid, Spain**
Bachelor in International Relations, International Political Economy — **September 2023 – June 2027**
- **Activities and Societies:** Editor-in-Chief, IE International Relations Society; Politics & Economics Editor, IE Finance & Capital Markets Club; Member, IE Investment Club.
- **Thesis in Progress:** *How political institutions shape repayment credibility and sovereign borrowing in emerging markets.*

SELECTED RESEARCH AND ANALYTICAL PROJECTS

The Long End | Independent Research and Writing — **September 2026 – Present**
- Test the stability of the relationship between U.S. deficits and estimated Treasury term premia using New York Fed, Federal Reserve Board, Treasury and FRED data; publish charts, downloadable data and robustness checks.
- Assess fiscal-year alignment and data-vintage effects; write about Treasury ownership and Treasury International Capital (TIC) data, distinguishing custody locations and holdings from evidence of investor price sensitivity.
- Analyzed Brazil's post-election repricing in FX and sovereign bonds, comparing local-currency yields with dollar credit spreads.

Repo Market Model | Economic Research Advisor — **September 2026 – October 2026**
- Advised on public-data selection and economic interpretation for a collaborative Treasury repo-market model, relating reserves, Treasury cash balances and settlement timing to funding conditions.
- Analyzed ON RRP balances and SOFR–IORB spreads; specified useful outputs for interpreting funding pressure and its contribution to monthly average spreads.

Ethical Tech CoLab | Climate Intelligence Hackathon — **September 2026**
A research collaboration between Microsoft and the NYU Center for Global Affairs
- Helped develop a scenario-based financial loss model for NVIDIA's critical-mineral supply chain, combining disruption probability, severity and revenue exposure; team placed second overall.
- Assessed how inventory buffers, outage duration and alternative sourcing change potential supply-disruption losses.

RELEVANT EXPERIENCE

EDEN Fund | IE University Student Endowment Fund — **Madrid, Spain**
Senior Macro Research Analyst — **May 2025 – November 2026**
- Oversaw monitoring of active ETF positions, assigned analyst coverage and led reassessments of macroeconomic drivers, investment theses and portfolio diversification.
- Tested five macroeconomic variables in a regression supporting a Cirrus Logic investment pitch; interpreted quantitative evidence to inform recommendations to the Macro Portfolio Manager.

U.S. Embassy Madrid — **Madrid, Spain**
Political Section Summer Intern — **June 2025 – August 2025**
- Assessed fiscal allocations and defense spending across NATO members, translating cross-country research into briefing materials for visiting U.S. congressional delegations.
- Monitored Spanish political and macroeconomic developments and prepared concise analytical briefs supporting State Department reporting to Washington.

IE NYC Finance and Strategy Club — **New York, NY**
President and Co-founder — **August 2026 – Present**
- Lead a 10-member team coordinating practitioner events and site visits with finance professionals, faculty and career teams; maintain relationship records and follow-up workflows.
