RELEVANT EXPERIENCE & PROJECTS

IE NYC Finance & Strategy Club – *Established 2025 | Relaunched 2026* [Website] — **New York, New York**
President — **August 2026 - Present**

- Lead a 10-member student team in developing relationships with finance practitioners, alumni, faculty, and career teams to originate events, site visits, and cross-campus finance programming.
- Build and maintain the club's public website and relationship-management system using AI-assisted research workflows to identify prospects, personalize outreach, and manage follow-up.

EDEN Fund – *IE University's €50k AUM Endowment Fund* — **Madrid, Spain**
Senior Macro Research Analyst — **May 2025 - Present**

- Oversee portfolio monitoring of active ETF positions, assigning coverage to junior analysts and leading reassessments of investment theses, macro drivers, and portfolio diversification.
- Conduct sector research across technology, AI infrastructure and consumer staples, running quantitative tests to inform recommendations to the Macro Portfolio Manager.
- Developed an econometric model using five macro variables to validate a buy thesis on Cirrus Logic (CRUS), identifying Taiwan Manufacturing PMI as the only statistically significant predictor of positive equity returns.

Repo Market Model – *U.S. Treasury Funding-Stress Forecasting* [GitHub] — **New York, New York**
Research Advisor, Repo Markets — **September 2026 – Present**

- Analyzed the relationship between ON RRP balances and repo-market pressure, finding SOFR-IORB spreads above 5bp on 15.6% of days when balances were below $100bn, versus 0.5% otherwise.
- Specify model outputs to estimate repo spreads on funding-pressure dates, measure how funding spikes affect monthly average spreads, and assess reserve scarcity.

Ethical Tech CoLab – *Microsoft and NYU Center for Global Affairs Research Collaboration* [GitHub] — **New York, New York**
Trace the Unseen: Climate Intelligence Hackathon — **September 25, 2026**

- Developed an expected disruption loss model for NVIDIA's critical-mineral supply chain, combining disruption probability, loss severity, and revenue exposure as part of a team placing 2nd overall.
- Evaluated supply-disruption scenarios to quantify financial losses from prolonged outages and assess how inventory buffers and alternative suppliers could reduce these losses.

U.S. Embassy Madrid — **Madrid, Spain**
Political Section Summer Intern — **June 2025 - August 2025**

- Assessed fiscal allocations and defense-spending policy across NATO member states, translating cross-country research into briefing materials for visiting U.S. congressional delegations on European security and allied burden-sharing.
- Tracked Spanish political and macroeconomic developments through daily media monitoring, synthesizing material developments into concise analytical briefs supporting State Department reporting to Washington.

CERTIFICATIONS & SKILLS

- **Certifications:** CFA Program Level I Passed (November 2025), FINRA SIE Exam, registered for December 1, 2026.
- **Technical Skills:** Microsoft Excel, Python, GitHub, AI-assisted research and development (Claude Code, Codex).
- **Languages:** English (Native), Spanish (Native), Portuguese (Professional).
